

intellaspot

Hard-edge automated luminaire

Key features

- Auto-ranging 100-240V 50/60 Hz
- High efficiency 20,000 lumens
- 850w HID lamp - 750 hrs.
- 5:1 zoom - 11°-55°
- CMY color mixing plus variable CTO
- Color wheel with replaceable positions
- Two seven position plus open rotating gobo wheels
- Rotating prism
- Animation system
- Mechanical and electronic strobe
- Variable soft edge
- Fast mechanical iris
- Indigo Highlighter LED output
- Color LCD menu with battery operation
- Low ambient noise
- RDM compatible

Barco's intellaspot represents the next generation in innovative optics, with a high light output, energy efficiency, zoom range, and overall feature set — all at a highly economical price point. The fixture is a hard-edged moving yoke light that features smooth CMY color mixing as well as variable CTO. Its fixed color wheel allows instant color choices via easily exchangeable dichroic filters. Two rotating Lithopattern® wheels, each with seven patterns plus open, provide a large number of output patterns and images. The output can be further enhanced with a rotating prism and an animation wheel.

With a powerful optical system, the intellaspot not only produces a strong 20,000 lumens light output from its 850w HID lamp, but also provides clear projections with a large zoom range of 11° to 55°. With its fast mechanical iris, variable soft edge and electronic strobing, the intellaspot is truly a full-featured automated luminaire.

The intellaspot also includes the patented Indigo Highlighter feature. Exclusive to the intellaspot, the indigo highlighter provides designers with additional light output from four 1-watt indigo LEDs, thus increasing the layering abilities of the large-exiting aperture fixture.

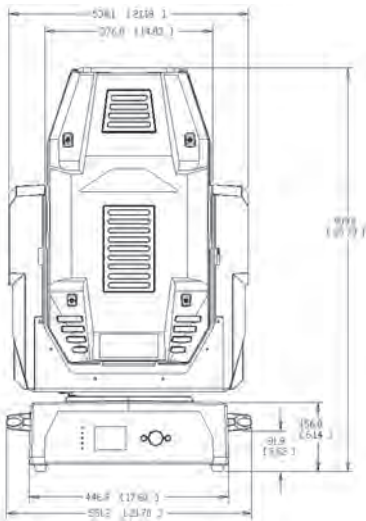

Built on an entirely new platform, the intellaspot combines new technologies to create an exceptionally energy-efficient fixture that is fully in line with an environmental approach to technology. A battery-controlled full color LCD menu system enables fixture addressing without having to power up the unit. Low ambient noise, and RDM capabilities make the intellaspot the professional choice for a wide variety of applications.

HIGH END SYSTEMS

a Barco company

Dimensions

Weight

115 lbs (52.16k kg)

Optional

- Touring roadcase

Easy Carry yoke-arm handles

Optional Touring Roadcase

14 glass rotating gobos
