

Are you looking for a dynamic POS display that is bigger than a normal plasma screen. A screen with much higher brightness that only costs a fraction and offers far better black level? Then the dnp Ultra Contrast Screen for Point of Sale / Signage is exactly what you need!

dnp optical rear  
projection screens

The UCS POS Screen is an advanced optical rear projection screen optimized for dynamic display applications in bright Point of Sale and Signage environments.

The screen incorporates special technologies that enhance contrast and reject ambient light and is therefore suitable for use in extreme bright environments.

The UCS POS Screen displays bright, sharp images over a broad viewing area, offering passers-by a clear view from all angles. Once their attention is caught, the ultrafine resolution allows the screen to be viewed at very close range. And the easy-clean front surface makes it suitable for applications where the screen is likely to be touched – e.g. in a shop environment.

The UCS POS Screen is as standard available in sizes up to 70" in 4:3 format and up to 65" in 16:9.

- > A true eye-catcher for passers-by
- > Ultra high image brightness and contrast
- > Superb viewing angles and resolution
- > Screen sizes up to 70"
- > Easy to install and maintain
- > Cost effective
- > Compatible with all single lens projectors

# Specifications

## Short focal off-axis screen

Screen: 108% center off-set  
 Projector: 108% off-axis +/- 5% 4:3  
 Ceiling- or table mount

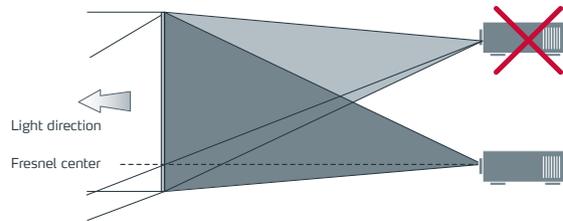

## Long focal off-axis screen

Screen: 85% center off-set upside  
 Projector: Can be 85% off-axis +/- 15%. Ceiling mounted

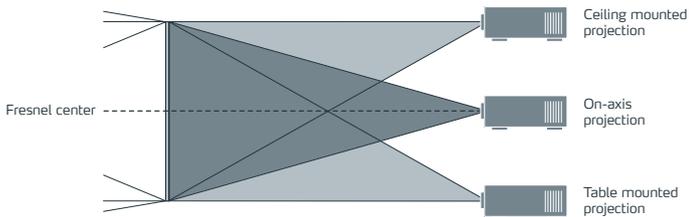

Screen: 85% center off-set - down site  
 Projector: Can be 85% off-axis +/- 15%. Table mounted

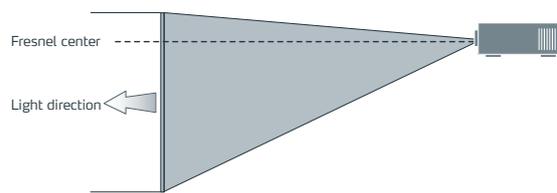

## Conventional screen with different available focal and non center off-set

Projector: 100% off-axis. Ceiling-, table mount or on-axis

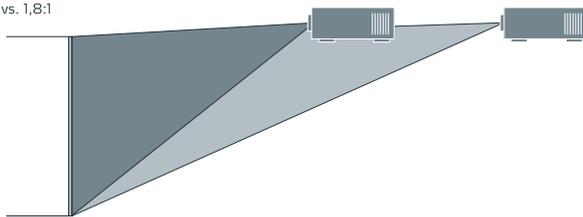

## Center off-set vs. non off-set

Screen: 85% center off-set upside  
 Projector: Can be 85% off-axis +/- 15%. Ceiling- or table mounted

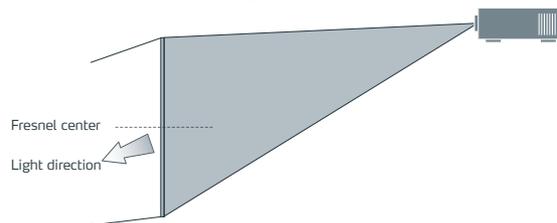

## Short focal vs. long focal screen

Lens throw 1:1 vs. 1.8:1

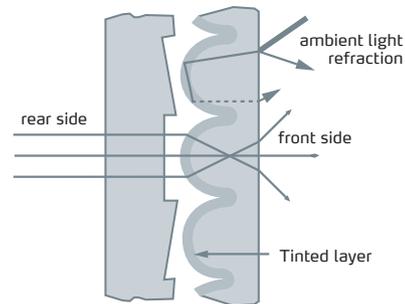

Screen: Non center off-set  
 Projector: Can be 113% off-axis, Ceiling- or table mounted

# General information

## Screen profile (horizontal section)

The Fresnel lens on the rear element refracts projected light directly through the screen. The reverse UCS lenticular lenses on the front element distribute the light horizontally, enhance contrast and reduce the impact of ambient light.
