

# dnp Integrated **Rearpro Rigs**

dnp's new Integrated Rearpro Rigs consist of a series of simple and cost-effective modules for easy installation of rear projection screens.

## **Save time, space and money**

The integration of projector and mirror rigs in one flexible solution makes alignment of projector and mirrors a breeze. To reduce installation time even further, the rig is pre-assembled on delivery.

With a smaller footprint than previous models, the new range reduces build-in depth by approximately 60 %. This makes them ideal for environments with limited installation space, such as meeting rooms, conference rooms and home applications.

## **Robust design for big installations**

Designed to support the weight of heavy glass mirrors, dnp's new Integrated Rearpro Rigs are also ideal for the installation of very large screens in control rooms and TV studios.

The rigs are available in One-mirror or Two-mirror versions covering the entire range of dnp rear projection screens. Choose between glass or foil mirrors (please order separately).

All standard projectors with a recommended lens throw ratio from 0.75 – 1.6:1 are supported.

## **Key benefits**

- > Simple, cost-effective solution
- > Robust, no-frills design
- > Easy alignment of projector and mirrors
- > Pre-assembled on delivery
- > Available for both glass and foil mirrors

# dnp Integrated Rearpro Rigs Specifications

## One-mirror solutions

### SMALL #6115

Mirror width up to	1750 mm
Sill height up to	1200 mm

### MEDIUM #6135

Mirror width up to	2300 mm
Sill height up to	900 mm

### LARGE #6155

Mirror width up to	3300 mm
Sill height up to	600 mm

## Two mirror solutions

### SMALL #6125

Mirror width up to	1750 mm
Sill height up to	1200 mm

### MEDIUM #6145

Mirror width up to	2300 mm
Sill height up to	900 mm

### LARGE #6165

Mirror width up to	3300 mm
Sill height up to	600 mm

## Higher sill height available

Height extension per 500 mm #1254

## First surface glass mirrors incl. frame

### Dimensions (WxH mm)
