DCS-200

Dual-channel true seamless switcher with output preview

The DCS-200 is a dual-channel switcher designed to provide true seamless switching between different input sources, while maintaining superb scaling quality at an affordable price. It has been designed for straightforward and simple operations, which makes it the ideal seamless switcher for live events, boardrooms, hotel ballrooms, houses of worship, educational applications, training facilities and more. Building on the quality and economy of the DCS-100, the DCS-200 adds an independent and highly flexible preview output to the system.
