DISplayer² SD

DISplayer² SD

Secure and rugged player

The DISplayer² SD is a secure and rugged player including passive cooling. All industrial components have a long lifetime and spare parts are long time available.

These benefits make the player more reliable and faster, the operating system is stored on the solid state drive.

Developed for 24/7 applications

The DISplayer² SD has been developed for 24/7 applications. The Real Time Operating System is not Windows based so there's no risk for hacking or virusses.

Compatible with almost any type of display

The DISplayer² SD is compatible with almost any type of display. Large, small or almost any brand of display can be connected to the DISplayer² SD.
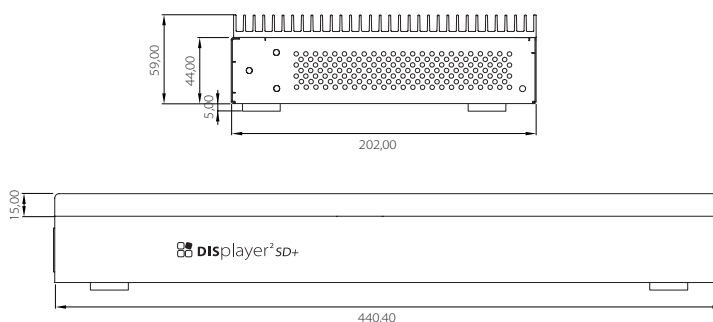

Compatible with most popular media/content formats

The secured and rugged player is also compatible with most popular media/content format like flash, jpegs, gifs, png etc. so animated content can be showed.
