

EW230U-ST

Ultra-short throw

Sharp & clear widescreen images
from a distance of just 63cm from the screen

Ultra-short Throw Projection

The issue of presenting in environments with limited projection space can now be eliminated with the new EW230U-ST. This native WXGA projector is equipped with an ultra-powerful short-throw lens that can project an amazing 60-inch diagonal image from a distance of just 63cm (25 inches) from the screen.

The short projection distance removes, previous concerns about presenters casting their shadow on the screen.

Network Connectivity

The EW230U-ST is equipped with a built-in LAN(RJ-45) terminal for remote operation when connected to a network. Additionally, when used with Crestron® software, integrated control of up to 250 projectors including power on/off control, message display on multiple projectors and confirmation of lamp service hours is possible using RoomView™/e-Control™ applications.

Wide-screen Compatible

The EW230U-ST is a WXGA projector with 1280 x 800 pixel resolution, supporting the shift towards wide-screen computer monitors. It reproduces a display area 1.3 times that of conventional XGA projectors, ensuring full compatibility with wider screens and eliminating the need for left to right screen adjustment. Depending on the software installed, dual-screen projection, such as simultaneous viewing of the menu and previews, is possible.

Display different windows side by side,
banishing the idea of left-right scrolling.
