Advanced, Multifunctional Projector – Ideal for large meeting rooms and theater-like settings

Mitsubishi Electric 7000 series projectors offer high levels of brightness and contrast, improved installation ease and eco-conscious features in consideration of the environment. Capable of ensuring clear, sharp large-screen presentations in large meeting rooms and theater-like settings, these user-friendly projectors are ideal for visual communication with impact.

New XL7100U/WL7200U/UL7400U

High Image Quality

Impressive 6000lm*1 Brightness and 2000:1*2 High Contrast

The XL7100U reproduces vivid beautiful images using 6000lm*1 brightness at a high contrast ratio of 2000:1*2. Even in large meeting rooms and theater-like settings, its liquid-crystal projection system ensures clear, sharp presentation images every time.

*1) WL7200U: 5500lm, UL7400U: 5000lm *2) At the iris on.

High-performance Lens

This lens is comprised of 17 lenses in 13 clusters, including a high-performance ED (ultra-low dispersion) lens that is more efficient than regular glass lenses. Image resolution all the way to peripheral borders is greatly improved.

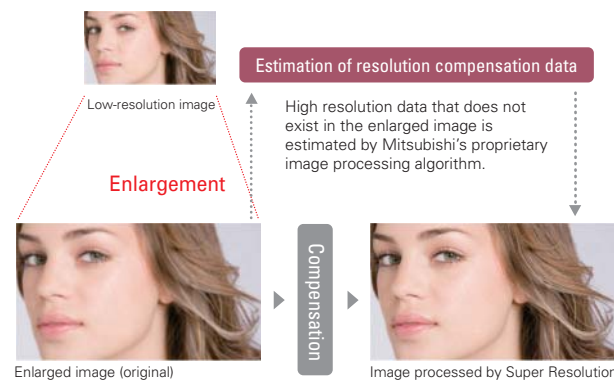

Natural Color Matrix (NCM)

In addition to conventional red (R), green (G) and blue (B) color gradations, the intermediate colors of yellow (Y), magenta (M) and cyan (C) can each be controlled independently. Accentuating specified colors according to need realizes the reproduction of vivid color tones one step closer to natural.

Super Resolution

This innovative advanced image processing algorithm is a product of Mitsubishi Electric. The technology analyzes blurred components of the original images, estimates the high-resolution data not provided in the original signal and corrects the image quality. The result is the clear projection of images such as people's faces in fine detail.

High Reliability

Inorganic Liquid-crystal Panel

An inorganic liquid-crystal panel is incorporated, increasing the service life compared to that of conventional organic liquid-crystal panels.

4000hr Long-life Lamp*

By optimizing temperature control design, the light-source lamp can be used for up to 4,000 hours. These improvements result in a remarkable reduction in operating cost.

*When used in low mode.

Lamp Life Comparison

Lamp life specification is an estimate based on verification under proper conditions and is not the duration of the warranty. Lamp will shut-off automatically when usage reaches the specified estimated maximum lamp hours. Service life may vary widely depending on usage and operating environment and conditions, as well as users' adherence to the maintenance and cleaning procedures provided in the user manual.

Roll-up Filter

To help prevent dust from collecting on the liquid-crystal panel, a cartridge-type filter is added as standard equipment. It can be set so that the filter rolls automatically every 500, 750 or 1,000 hours, or winding can be done manually.

Additional Features

Network Connectivity

Projectors are equipped with a RJ-45 LAN terminal for remote operation. Additionally, when used with Crestron RoomView™, integrated control of up to 250 projectors including power on/off control, message display and confirmation of lamp service hours is possible. Mitsubishi Electric 7000 series are equipped with AMX Device Discovery for simplified device management and compatible with PJLink™.

The trademark of PJLink is trademark applied for registration or registered trademark in Japan, the United States, and other countries and areas.

Installation Flexibility

Wide-area Lens Shift

The WL7200U features a wide-area lens adjustment range of ±70% vertically and ±30% horizontally, for greater installation freedom. The zoom, focus and lens shift functions are all powered operation.

*XL7100U: ±60% vertically, +30% horizontally
UL7400U: ±60% vertically, ±30% horizontally

Variety of Optional Lenses

Choose from four different lenses to best match the projection distance. Compared to previous lenses, each lens covers a wider range of projection ratios.

Bayonet Mount

The bayonet mounting system incorporated offers one-touch lens removal, making it easy to change lenses after installation. Simply unscrew and removed the anti-drop cover, press down on the release button and turn the lens to remove it. Similarly, to install a lens, just insert it and turn.

Attractive Design

In consideration of ceiling-mounted installation and appearance in terms of room décor, a modern center-lens, white-based design is adopted and a terminal cover that hides cables has been added. The remote-control signal receiving section is now located on the backside of the projector, improving remote-control operation performance when mounted on the ceiling.

Geometric Corrections

Keystone Correction

Trapezoidal distortion caused when the projector is not positioned directly in front of the screen is corrected in both vertical and horizontal directions.

Cornerstone Correction

Pixel conversion is used to correct trapezoidal and diagonal distortion that causes oblique images, ensuring the proper aspect ratio.

Curved-surface Projection Correction

Projectors in the series are equipped with a distortion correction function that can be used when projecting images onto curved surfaces. Coordinates at the image's four corners are adjusted, enabling the projection angle to be adjusted at the time of angled or stacked projection. It is extremely handy for unique applications like projecting images onto special surfaces such as pillars at event sites.

360° Projection Capability

Images can be projected over a full 360° range along the vertical axis* including reproduction on the ceiling or floor. The application possibilities are limitless.

*Excluding use in high-altitude mode.

ID-compatible Remote Control

(set IDs for up to 63 projectors)

Extended-distance Remote Control (wireless: 30m, wired: 100m)

Lamp side replacement

Eco friendly

4000hr Long-life Lamp*

A light-source lamp capable of operating up to 4,000 hours reduces both operating cost and labor required for replacing lamps.

*When used in low mode.

Stand-by Wattage under 0.3W*

Stand-by (low) mode power consumption is less than 0.3W, offering increased energy savings and further contributing to environmental preservation.

*When in stand-by (low) mode. At this time, use of the LAN function is not possible.

Quiet 30dB* Operation

Fan noise during projector operation can be distracting during a presentation or videoconference. The XL7100U and WL7200U projectors operate at a significantly low noise level of only 30dB (i.e., in "low lamp" mode). As a result, presentations and conferences can be held without distracting projector noise in the background.

*UL7400U: 32dB

Auto Power Off

If no image signal is output for a predetermined period of time*, power is automatically turned off, realizing energy savings by reducing needless power consumption.

*Time preset by user

Paint-free Cabinet

As a measure to help protect the environment, eco-conscious paint-free cabinets are incorporated for XL7100U, WL7200U and UL7400U projectors.

2-Screen mode
