### Secure and rugged player

The DISplayer² Lite is a secure and rugged player including passive cooling. All industrial components have a long lifetime and spare parts are long time available.

These benefits make the player more reliable and faster, the operating system is stored on the solid state drive.

### Developed for 24/7 applications

The DISplayer² Lite has been developed for 24/7 applications. The Real Time Operating System is not Windows based so there's no risk for hacking or viruses.

### Compatible with almost any type of display

The DISplayer² Lite is compatible with almost any type of display. Large, small or almost any brand of display can be connected to the DISplayer² Lite.

### Compatible with most popular media/content formats

The secured and rugged player is also compatible with most popular media/content format like flash, jpegs, gifs, png etc. so animated content can be showed.
