

STRATEGY AIR™

STRATEGYAIR™
THE FUTURE IS FREE

EXPERIENCE THE FREEDOM

No longer must you choose between durability and design. The future heavy duty 24/7 console is here. Introducing Strategy Air, the first open concept console. Designed for lifetime use, the Strategy Air incorporates the latest in cable management, technology integration and design, while offering a fully scalable and flexible solution.

The Strategy Air is the first console to take full advantage of control rooms that utilize remote blade server technology. This allows the console and operator to be free from IT infrastructure and free from unsightly cables with its innovative cable management system.

THE EVANS ADVANTAGE

Over **30 years** of manufacturing experience

Equalling over **9000 successful** installations worldwide

Rich and Diverse **Fortune 500** client list

Government Agencies, Oil & Gas, Airports, Air Traffic Control, Chemical Plants, Military **and More**

An **ISO 9001** Certified Manufacturer

Evans Quality Assurance ensures that **all** clients consistently receive control center solutions that **precisely match** their intended application

Greenguard Certified Products

Products designed for use in office environments and other indoor spaces meet strict emissions limits, which contribute to the **creation of healthier interiors.**

Steel frame structure and sub structure

Free standing without the need of panels, robust and built to last the abuse of **24/7 intensive** use environments.

DESIGNED TO LOOK GOOD AND PERFORM GREAT

Free from Cables and Cords

Part of Strategy Air's beauty is not what you see; it's what you don't see. The simple open design hides cables and cords within the structure of the console. Hanging cables, tangled cords, and unappealing clutter are a thing of the past, leaving nothing to the eye but clean lines and clear workspaces

Removable PC Holder

For maximum versatility, the Strategy Air™ offers a removable PC holder for environments that require PC access at the console. Environments that have incorporated remote server technologies can remove the PC holder and enjoy the true open concept that the Strategy Air™ showcases.

Communication and Collaboration

The open concept profile encourages communication and collaboration. The unrestricted workspace allows operators to interact freely, allowing for the open exchange of ideas and improved work flow between team members. Shown here with the optional 45° configuration option.

Creative Freedom

Limited only by your imagination and creativity, the Strategy Air™ offers a wide variety of customizable options. From endless worksurface colors and patterns to customizable leg inserts, this console is designed to look good from the frame up.

GREENGUARD, the most familiar product certification and a globally recognized leader in indoor air quality, has been certifying products since 2001. GREENGUARD is an independent third party certification program that certifies products for low non-toxic emissions. Our furniture is manufactured using recycled and low emitting materials that help our customers meet and exceed environmental standards in their projects. Evans products can be constructed in such a way that they support the LEED Certification of your facility.

Evans has achieved ISO 9001:2008 registration ensuring that the company meets a consistent quality standard for our control center designs, products and servicing
