

DIVERSITY

ULTIMATE SOLUTION FOR DEMANDING 24/7 APPLICATIONS

Versatility & Durability For Even The Most Robust Environments

The ultimate solution for 24/7 durability in demanding environments, the Evans Diversity™ console offers a winning combination of modular configuration, enhanced ergonomics, and aesthetic styling, making it the leading choice in the console industry. From the simplest control console to the most complex, Diversity™ offers the widest range of aesthetic and functional options ever offered in a price-conscious console system.

This system consists of stackable modules and accessories, which can be assembled in a variety of configurations to suit most control center applications. The four main subsystems of Diversity™ (structural frame, equipment mounting kits, exterior panels and console accessories) work together to provide a level of versatility, durability and aesthetics previously only associated with custom crafted cabinetry and not achievable through conventional console construction methods.

Arguably the best overall value in the console industry, the Diversity™ has been a proven winner for our clients for years.

THE EVANS ADVANTAGE

Over **30 years** of manufacturing experience

Equalling over **9000 successful** installations worldwide

Rich and Diverse **Fortune 500** client list

Government Agencies, Oil & Gas, Airports, Air Traffic Control, Chemical Plants, Military **and More**

An **ISO 9001** Certified Manufacturer

Evans's Quality Assurance ensures that **all** clients consistently receive control center solutions that **precisely match** their intended application

Greenguard and **LEED** Certified Products

Products designed for use in office environments and other indoor spaces meet strict emissions limits, which contribute to the **creation of healthier interiors.**

Steel frame structure and sub structure

Free standing without the need of panels, robust and built to last the abuse of **24/7 intensive** use environments.

HIGHLIGHTS OF THE DIVERSITY CONSOLE

1 Limitless Configuration:
Single high or triple high modules

2 PC Storage:
A cavity at the back of the console provides space for PC storage. Hinged doors or sliding compartments provide easy access and more knee space

3 Access:
Hinged access panels, gull-wing lift back and rear access panels for cables and equipment.

4 Variety:
A huge range of equipment options are easily incorporated into the design of your Diversity Console.

24/7 Durability

A modular steel and aluminum internal structure ensures the Diversity™ can withstand the rigors of 24/7 control center applications while the high-pressure laminate work surface ensures day-to-day durability.

Modular & Reconfigurable

With its stackable modular building block design, Diversity™ allows for great flexibility to meet your requirements. As a single-high, it can be changed from full depth to reduced depth, or even from a desktop to double high with minimal add-ons, and can accommodate a wide range of electrical equipment

Convenient Equipment Access

Hinged doors and removable equipment fronts offer unlimited access to all your electrical equipment for servicing. In addition, all processor shelves and equipment fronts are designed with a quick release system to allow for easy removal.

Triple-High Modules

Our only console solution that can be configured up to 3 tiers high, Diversity™ offers this unique ability to maximize user functionality without increasing the console footprint. An ergonomically friendly viewing angle ensures maximum operator comfort and effectiveness.

Finishes, Accessories & More

External panels are available in standard LPL finishes with durable HPL finished work surfaces. A variety of equipment fronts are available to facilitate the mounting of phones, binders, paper storage accessories, rack mount equipment, control switches and other custom equipment.

GREENGUARD, the most familiar product certification and a globally recognized leader in indoor air quality, has been certifying products since 2001. GREENGUARD is an independent third party certification program that certifies products for low non-toxic emissions. Our furniture is manufactured using recycled and low emitting materials that help our customers meet and exceed environmental standards in their projects. Evans products can be constructed in such a way that they support the LEED Certification of your facility.
